› Core Capabilities

- Coding (Computer Programming) Curriculum Pathway
- Certificate test preparation in HTML, CSS, JavaScript, Python, React, and Others
- Student support and lab times for questions and one on one help
- Live teacher led instruction available
- Usable with Popular LMS Systems like Canvas

SAM UEI: CTVQTCYQGLL5
CAGE: 9TY03

› Differentiators

- We build a pathway to higher learning
- Real programming for real world opportunities
- Live chat support that students, parents & teachers appreciate
- Designed by programmers for youth and adults
- Coding instruction that's affordable

› Company Information

Simply Coding teaches youth starting at age 8 all the way to adults! The goal is for each student to learn coding using professional tools receiving real world coding experience. This experience of learning to code their own games, websites, and apps will increase their confidence, improve their mental health, and offer more possible career opportunities. Those who want to build off this skill can more easily enter internships and continued education.

Simply Coding is committed to providing highly knowledgeable instructors that range from local college students in the CS major to Master Degree teachers. All share a love for education and a desire to work with individuals to give them a positive experience. To make this program more accessible and affordable, Simply Coding partners with secondary schools, colleges, universities, and other public facilities to access their computer labs during low use hours. This gives participants a local familiar location to go along with the trained instructor teaching our proven curriculum pathway. We strive to grow our students' desires to learn to code and market themselves in a tech driven world.
